Notes:
1. One-year minimum subscription
2. Server activation will be counted since we activate the server and complete the configuration.
3. Restoring backup will cost an additional cost per day (minimum of 1 day), depending on days from last access backup.

4. Have the option to upgrade Cloud Server to a higher package whenever there's an overload of visitor. Cost will be counted by difference day on upgrade. Temporary upgrade will only include Memory, CPU Core, and Bandwidth. (There will be downtime on upgrade).
5. Only one available domain/website in hosting.
6. Client will get access to cPanel account.
7. SSD storage is used to store file and website's database and email including OS.
